- A British Company

# Public Lecture

**For Graduate Mathematicians  
Engineers and Physicists**

**Date** Wed 12th March 2008  
**Time** 1430  
**Place** Department of Mathematics - MSR, Univ. of Ruhuna  
**Speaker** Dr Elmo Perera – CEO, EMDigital UK

With headquarters in the UK, EMDigital is one of the fastest growing defence and aerospace companies, concentrating on the design, development and production of a range of powerful direct drive rotary high torque low speed motors and state-of-the-art motion control systems and drive electronics for future UK and NATO nuclear submarines. We specialise in award winning new products to total turnkey solutions. Our customers include world's leading aerospace and defence organisations.

The company is now entering an exciting stage of its growth, with its product development centre in Sri Lanka. Sri Lankan operation under strategic leadership from the UK carries out pioneering product innovation, development and prototype work. EMDigital offers excellent working conditions, negotiable salary to match qualifications, benefits and career opportunities and excellent on job training including some in the UK. The best graduate specialists are given opportunities for Post Graduate studies in the UK, including transfer to UK employment.

**Opportunities - We specialise in Multi-physics modelling, mathematical modelling, Non-linear theory, Mechatronics, embedded systems, power electronics, motion controls, image and video processing.**
